

Raf Grassetti - *All That Remains*/Del - *Balance* What We Know One Pager

Twitter: @JonathanHerit^a

Background

Raf Grassetti and Del, the creators with the highest \$ASH sales volume apart from Pak, the creator of the \$ASH currency, have each launched an \$ASH exclusive drop in February, between Pak's Ash Chapter One and Ash Chapter Two drops. The \$ASH ecosystem allows Pak and other creators' NFTs to be burned in return for a declining amount of \$ASH currency. \$ASH was created in a fair launch, and significant number of artists are selling their creations exclusively in \$ASH.

Raf Grassetti is one of the best known digital sculptors in the world and is the current Art Director for the God of War franchise, and has been a top-selling artist in auctions held by Sotheby's and Christie's. Del has years of experience as an artist working in the entertainment industry, and is the first artist to sell exclusively in the \$ASH currency. Both artists will be participating in the upcoming Ash Chapter 2 collection curated by Pak.

All That Remains by Raf Grassetti - www.ironfaceless.com

- Initial drop of 555 *Iron Coin of the Faceless* tokens on Jan 17 for 11 \$ASH each
- **Phase 1: Initiation**
 - Sale of 3 distinct 'Tier 1' (T1) masks, *Alpha*, *Sirius*, and *Orion*, between Feb 11-17 for 44 \$ASH each
 - 299 editions of each (897 total) were sold privately, with each Iron Coin providing the holder with the opportunity to buy 2 different T1 masks, with a max of 6 per wallet
 - A significant portion of the artist's T1 \$ASH proceeds were fed into the Uniswap v3 LP
 - Holders of a Iron Coin and all 3 T1 masks were airdropped a single edition of *The Collective* on Feb 18 (w/ 111 total), displaying a 3D GLB image of the four items, and playing no role in Phase 2
- **Phase 2: Merge and Burn (expected the week of Feb 28)**
 - One Tier 2 (T2) mask will be revealed at a time, each with 'its own claim mechanics' and support both \$ASH and \$ETH
 - 1 Iron Coin and 1 T1 mask are required to participate, and every T2 mask requires burning either an Iron Coin or T1 mask
 - Mask options will be available for all collectors, but 'hierarchy' (i.e. having more masks and coins) matters, with additional mask tiers hinted
- **Phase 3: Exalt:** 'Masks will be counted, Coins will be preserved, Kings will be crowned.'

Balance by Del and 0XG - www.findbalance.art

- **Phase 1: Mint** Initial drop of 3173 visual/audio *nu* ("Neutral Form") NFTs on Feb 18-19 for 6 \$ASH
- **Phase 2: Weight Distribution**
 - *nu* may be irreversibly Transformed into 5 other forms (*tau*, *xi*, *iota*, *pi*, and *kai*), and *nu* exists to be Transformed; *kai* is no longer available from Transform, and may not be Transformed or Fused
 - Transformation will always be a possibility but some forms may become suddenly unavailable
 - Transformation and Fusion are gated and only one action is open at any time
- **Phase 3: Chase Balance**
 - Fusion will be unlocked on March 2, which permits holders to irreversibly combine exactly two Balance forms in the same wallet together to create a single, rarer, more elegant form
 - The forms created through Fusion are determined by fixed formulas and there will not be useful fusions of identical forms
 - The game culminates in fusing to obtain an NFT form which succeeds in 'finding balance,' as indicated through its music and visuals
- Transformation and Fusion require network gas to execute
- The game includes at multiple fusion layers, some twists, and an aspect involving discussion in the Del Discord, where additional information on game rules is available
